PROFESSIONAL SUMMARY

React Developer with hands-on experience building responsive web and mobile applications using JavaScript, React.js, React Native, HTML5, CSS3 and Tailwind CSS. Experienced in reusable component development, responsive UI implementation, API integration, Git/GitHub workflows, debugging and converting product requirements and Figma designs into functional interfaces. Currently contributing to industrial product development at SequSpace Technology, with project experience across employee management, task tracking, productivity and student-focused mobile application workflows.

TECHNICAL SKILLS

Frontend: JavaScript (ES6+), React.js, React Native, HTML5, CSS3, Tailwind CSS, Bootstrap, Material UI, SASS

Programming: JavaScript, TypeScript (working knowledge)

Backend & APIs: Node.js, Express.js, REST APIs, MongoDB (working knowledge)

Tools: Git, GitHub, VS Code, Postman, Figma, Vite

Testing: Jest, React Testing Library (working knowledge)

Core: Responsive Web Design, Reusable Components, API Integration, State Management, Debugging, UI Development

WORK EXPERIENCE

React Developer | SequSpace Technology Private Limited | 2026 – Present

- Develop responsive and reusable frontend interfaces using React.js, JavaScript, Tailwind CSS and component-based architecture.
- Translate Figma-based product requirements into functional web interfaces while maintaining responsive behavior across desktop, tablet and mobile devices.
- Contribute to the SequTrack product, developing employee and admin dashboard interfaces for task management, time tracking, attendance and productivity workflows.
- Build and maintain reusable UI components including navigation, sidebars, topbars, statistics cards, charts, task views and responsive mobile interactions.
- Integrate frontend screens with backend APIs and troubleshoot UI, state, responsiveness and cross-browser issues during development and testing.
- Use Git and GitHub for source control, collaboration and maintaining development workflows.

Frontend Trainee / Intern | Prodigy InfoTech | 2025

- Developed responsive and interactive web interfaces using HTML, CSS and JavaScript.
- Implemented frontend development tasks involving DOM manipulation, event handling and reusable UI patterns.
- Used Git and GitHub to manage source code and project iterations.

Frontend Intern | Bluestock Fintech | 2025

- Worked on frontend implementation and UI development tasks using modern web technologies.
- Translated requirements into responsive web components and contributed to interface improvements.

INDUSTRIAL & KEY PROJECTS

SequTrack – Employee & Admin Management Platform

Industrial Project | React.js, JavaScript, Tailwind CSS, Recharts, Lucide React, REST APIs

- Developed responsive employee and admin dashboard interfaces for employee productivity, task management, time tracking and attendance workflows.
- Implemented reusable React components including Sidebar, Topbar, Greeting, Statistics Cards, Task Chart, Attendance, task lists and task-detail interfaces.
- Built responsive navigation with mobile sidebar behavior and optimized layouts for desktop, tablet and mobile screens without disrupting the desktop experience.
- Integrated data-driven charts and UI states to present task progress, attendance and productivity information in a clear dashboard format.
- Worked on API-connected frontend flows and participated in debugging, responsive QA and UI refinement based on product requirements.
- Applied component-based architecture and reusable styling patterns to keep the dashboard maintainable and scalable.

PadhaAlgo – Student-Focused Mobile Application

Mobile Application Project | React Native, JavaScript/TypeScript, React Navigation, API-oriented Architecture

- Developed a student-focused mobile application concept designed around AI-assisted learning and career discovery.
- Planned and implemented core application flows for AI Doubt Solver, AI Career Guidance and Institute Finder functionality.
- Built React Native screens and reusable components with mobile-first navigation and a clean student-friendly user experience.
- Designed the AI Doubt Solver flow so students can select a subject, submit a question and receive a simplified explanation with supporting visual guidance where applicable.
- Designed the AI Career Guidance flow around student interests and subjects to provide relevant career suggestions.
- Designed the Institute Finder flow to support location-based discovery of educational institutes.
- Structured the application for future API integration and scalable feature development.

EDUCATION

Bachelor of Computer Applications (BCA) | Academy of Business Administration (ABA), Balasore | Fakir Mohan University
2022 – 2025 | CGPA: 7.91 | First Class with Distinction | Aggregate: 73.15%

TRAINING

- Full Stack MERN Development with Generative AI and DSA – Cuvette Tech
- Core technologies: React.js, JavaScript, Node.js, Express.js, MongoDB, Git/GitHub
